Housefull 4 HD 1080p Blu-ray Tamil Movies. HD Download most movies & TV serials at mega as exclusiveQ: Using find() to find a string in a file and replacing all instances of that string Using PHP, I am trying to find all instances of one string in a simple text file and replace it with another string, and I cannot get the replacement to work. The file is fairly simple, just: SOME STUFF A S OME MORE STUFF Using the following code: \$search = 'A'; \$replace = 'B'; \$file = file_get_contents('/home/pi/log.txt'); \$find = find(\$search, \$file); \$file = str_replace(\$search, \$replace, \$file); I have tried searching for the string using the following and just using the variable values that I am searching for: function find(\$regex, \$string) { if (preg_match(\$regex, \$string)) { return true; } return false; } I have also tried using the following to see if it would find the search, but it doesn't: function find(\$string, \$regex) { if (preg_match(\$regex, \$string)) { return true; } return false; } and then: \$find = find(\$search, \$file); \$file = str_replace(\$search, \$replace, \$file); I've also tried this to see if it would work, and it doesn't. \$file = str_replace(file_get_contents(\$file), \$replace, \$file); Any ideas as to what I'm doing wrong? A: With the following three substitutions: \$search = 'A'; \$replace = 'B'; \$file = file_get_contents('/home/pi/log.txt'); \$find = find(\$search, \$file); \$file = str_replace(\$search, \$replace, \$file);
